

*CITY OF TEN THOUSAND BUDDHAS  
CULTIVATING VIRTUE JUNIOR AND HIGH SCHOOLS*

***ANNOUNCEMENT TO STUDENTS***

Cultivating Virtue High School provides tuition-free education to all qualified students. The emphasis at this level of study is placed on filial piety and loyalty to this country. Children are provided the means to develop their own inherent potential, for it is good characters that make good people; good people who make good leaders and citizens; good leaders and citizens who make good countries; good countries which make a good world. Therefore, young people who attend Cultivating Virtue School are taught early on that the future state of affairs in the entire world lies in the hands of the youth.

Since the moral character of each individual contributes to the atmosphere of the entire world, students are encouraged to develop a deep sense of loyalty to the land they live in and to pursue professions which will bring benefit to humankind, to the natural environment, and to the world system at large.

Young men and woman at Cultivating Virtue school study separately and no youth is permitted to entice his or her fellow students with seductive behavior. The use of cigarettes, intoxicants such as alcohol, hallucinogens and other such stimulants and depressants is strictly prohibited, not only on the grounds of the City of Ten Thousand Buddhas, but in the daily lives of all students enrolled at Cultivating Virtue school. Further, young people at Cultivating Virtue school are informed of the physical, moral, and spiritual detriments of using birth control devices and are guided to refrain from illicit involvements with the opposite sex during their formative years before marriage. In a program of self-purification, rectification, and careful inquiry, students will be trained to honor their own spiritual goodness. Thus in the future they will become both academically and morally astute individuals and outstanding leaders among their peers. Youth is the time for singleminded and diligent pursuit of learning in order to insure the establishment of a solid foundation that will bring future benefit to one's family, one's country, the world, and the universe.

School is in session year-round.

### CITY OF TEN THOUSAND BUDDHAS INSTILLING VIRTUE ELEMENTARY SCHOOL

## ANNOUNCEMENT TO STUDENTS

Instilling Virtue Elementary School at the City of Ten Thousand Buddhas offers tuition-free its educational program to all qualified students. The emphasis during the early years of learning is placed on filial piety so children can learn the importance of repaying the deep kindness of their parents who bore and raised them. The concept of filiality extends to respect for teachers, elders, and ultimately to compassionate regard for living things.

Boys and girls study separately and no youth is permitted to entice his or her fellow students with seductive behavior.

Youth is a golden age, a time for amassing learning and developing good social awareness and wholesome character. Essential to this learning process is a righteous and unselfish attitude, wholesome conduct, and a spirit of self-sufficiency. Students are encouraged to take on constructive work-projects both indoors and outdoors so as to develop healthy bodies and minds. Frugality, respect, and filial compliance are the main emphases. With such a firm moral foundation young people will be prepared to cultivate

their persons, to regulate families, and to bring peace and order to their country and to the world in the future.
