人們說心老了一—這裡的「心」是塵境相對的心，非寂照圓明的常住真心。如果能熱愛生命、捨己為人，花甲高齡的人，也會變得青春愉快。

—宣公上人法語

When people say that the mind has grown old, this mind is the mind that responds to the mundane states, not the ever-quiescent, perfectly illuminating true mind. If one can ardently cherish life and sacrifice oneself for the sake of the others, even a person as old as sixty will still feel youthful and joyful.
